

Customer Service — How We Handle Enquiries

Internal reference for CS team | Not for external distribution

Last updated: January 2026

1. Overview

This document describes how our customer service team handles inbound enquiries today. We receive enquiries primarily by email through our Gmail inbox. All replies are sent manually by a CS team member after checking the relevant reference documents.

We currently have 3 CS staff sharing the inbox. There is no automated routing or AI assistance. Every email is read, assessed, and replied to by a human.

2. Our Reference Documents

When answering a customer, refer to the following documents:

Document	What it covers	Where to find it
FAQ Document	Common questions on returns, shipping, warranty, materials, care	Google Drive > CS Team > FAQ
Engraving Rate Card	Pricing, character limits, turnaround, script types	Google Drive > CS Team > Rate Cards
Servicing Rate Card	Battery, regulation, full service pricing and turnaround	Google Drive > CS Team > Rate Cards
Product One-Pager	Model specs, materials, strap options, compatibility	Google Drive > CS Team > Products
Shopify Admin	Order status, tracking, fulfilment, refund status	admin.shopify.com

3. Step-by-Step: How to Handle an Enquiry

Follow these steps for every inbound email:

1. Read the email fully. Identify what the customer is actually asking — sometimes the main question is buried at the end.
2. Check if the question is covered by one of our reference documents (see Section 2 above).
3. If yes: draft a reply using the relevant information. Keep it friendly and on-brand. See Section 5 for tone guidance.
4. If no: this is a new question we have not been asked before. Note it down (see Section 6 — New Questions Log) and check with the team before replying.
5. For order-related issues: log into Shopify first to check the order status before replying.
6. Send the reply. Mark the email as resolved in Gmail.

4. Common Enquiry Types & What to Do

4.1 Materials & Safety Questions

Examples: Is the strap BPA-free? Is the case hypoallergenic? Is the lume safe?

What to do: Check the Product One-Pager for the specific model. Most safety answers are there. If the question is about a specific certification we have not mentioned before (e.g. EU REACH, RoHS, MRI safety), check with the team before replying.

⚠ Health-conscious customers often ask about BPA, nickel, and skin reactions. The Product One-Pager has the answers for standard questions.

4.2 Engraving

Examples: Can I engrave a message? How many characters? What fonts? Can I change my engraving after ordering?

What to do: Use the Engraving Rate Card. Key things to remember:

- Standard text engraving: up to 40 characters including spaces
- Pricing: SGD 25 for up to 20 chars, SGD 35 for 21-40 chars
- If the customer wants to change/cancel an engraving AFTER ordering:
 - Within 1 hour of order: amend for free — update the order note in Shopify
 - 1-24 hours after order: SGD 15 amendment fee — check with team before confirming
 - After production has started: not possible — let customer know politely
- Logo or custom artwork: flag for team review, ask customer to send vector file

⚠ Engraved items cannot be returned unless there is a manufacturing defect. Remind customers to double-check spelling before confirming.

4.3 Strap Questions

Examples: Which straps fit my watch? Do you have a rubber strap? Is the strap BPA-free?

What to do: Check the Product One-Pager for strap compatibility. All current models use 20mm lug width and are compatible with any standard 20mm strap.

- FKM rubber straps: recommended for sports and sensitive skin
- Nylon NATO: lightweight, casual
- Titanium bracelet: premium, heavier
- Leather: dress wear, not recommended for water activities

If customer asks about strap recycling or sustainability certifications — we do not have this information yet. Note it down in the New Questions Log.

4.4 Watch Servicing

Examples: How much to replace the battery? My watch is running slow. What does a full service include?

What to do: Use the Servicing Rate Card. Key prices:

Service	Price (SGD)	Turnaround	Notes
Battery replacement	SGD 35	5-7 business days	Includes pressure test
Regulation (timekeeping accuracy)	SGD 60	7-10 business days	
Full service	SGD 180-250	3-4 weeks	Price depends on model
Crystal replacement	SGD 80-120	2-3 weeks	Price depends on model

If the customer is asking about servicing an older or discontinued model: check with the team first before confirming we can do it. Parts availability may be limited.

4.5 Order / Shipping / Tracking

What to do: Always check Shopify first before replying. Do not guess order status.

- Order status: log into Shopify, search by order number or email, copy tracking number into reply
- Tracking not updating after 5+ business days: escalate to shipping carrier, keep customer informed
- Wrong item received: ask for a photo, flag to team immediately for replacement
- Change delivery address: only possible if order has not been dispatched yet — update manually in Shopify
- Cancel order: if unfulfilled in Shopify, cancel and refund. If already shipped, ask customer to return it when it arrives.
- Customs duties: customer is responsible for import duties in their own country — we cannot predict the amount

4.6 Returns & Warranty

Key rules:

- Returns accepted within 14 days for unworn, unaltered items
- Engraved items: non-returnable unless there is a manufacturing defect
- Warranty: 2 years on movement. Does NOT cover physical damage, water damage from misuse, or strap wear.
- Warranty claim: ask customer to send photos or video of the defect, then flag to team

5. Tone & Brand Voice

When writing replies, keep these principles in mind:

- Friendly but not overly casual — we are a premium brand
- Direct — answer the question clearly, do not pad with filler
- Helpful — if we cannot help directly, point them somewhere useful
- Never promise what you are not sure about — check first

Good example reply opening:

"Hi [Name], thanks for reaching out! Happy to help with that."

Avoid:

- Starting every reply with "Great question!"
- Using overly formal language ("Dear Sir/Madam")
- Making promises about timelines you cannot guarantee

6. New Questions Log

If a customer asks something we have never been asked before and it is not in any of our reference documents, do the following:

7. Reply to the customer honestly — "Let me check on that and get back to you."

8. Add the question to the New Questions Log spreadsheet (Google Drive > CS Team > New Questions Log).
9. Discuss with the team at the weekly CS check-in.
10. Once we have an answer, update the FAQ document so we can answer it faster next time.

The log should capture:

Date	Customer question (paraphrase)	Theme	Status
8 Jan 2026	Are your straps vegan-friendly?	Sustainability	Answered — added to FAQ
15 Jan 2026	Do you offer carbon-neutral shipping?	Sustainability	Pending — checking with ops
22 Jan 2026	Is the watch shock-rated for trail running?	Product specs	Answered — added to FAQ
3 Feb 2026	Magnetic field resistance (MRI environments)	Product specs	Pending — checking with supplier
14 Feb 2026	Can I get corporate bulk pricing?	Sales	Redirected to corporate@boldr.co

7. Escalation — When to Ask for Help

Escalate to the team lead whenever:

- A customer is angry or threatening a chargeback
- A warranty claim involves significant damage or potential product defect
- A refund has been outstanding for more than 10 business days
- A corporate or bulk order enquiry comes in (more than 5 units)
- You are not sure of the answer and cannot find it in the reference documents
- A media or press enquiry comes in — forward to marketing@boldr.co

8. Contacts

Contact	Email	When to use
CS Team Lead	cs@boldr.co	Escalations, difficult cases
Service Centre	service@boldr.co	Servicing, warranty claims, repairs
Corporate Sales	corporate@boldr.co	Bulk orders, B2B enquiries
Marketing	marketing@boldr.co	Media, press, influencer enquiries
Shopify Admin	admin.shopify.com	Order lookups, cancellations, refunds
